CyberFrame

SIFT

Stop the email fraud your filter lets through.

Attackers are using Super Intelligence.

Are you?

SIFT catches advanced phishing and fraudulent emails before anyone acts on them.

It just works.

99.9%+
accuracy

0.001%
reported false positives

30 days
free trial on your own mail

It learns your mail. Your suppliers, your people, your normal.
The longer it runs, the sharper it gets.

WORKS WITH

- Microsoft 365
- Google Workspace
- cPanel hosting
- Any standard mailbox
- Personal email

Figures: live SIFT service, 2026.

01 WHY YOU NEED IT

Traditional email filtering is no longer enough.

TRADITIONAL FILTER

Looks for viruses and bad links.

A fake invoice has neither.

SIFT

Reads what the email asks.

Holds the fake before anyone pays.

Subject	From	To	Threat	Status
New bank details: invoice INV-4471	accounts@acme-supp1y.com	Finance team	BEC	Quarantined
Quick favour, are you at your desk?	david.mokoena.md@gmail.com	Accounts	BEC	Quarantined
Pallet quotation, request 22184	quotes@coastalpallets.co.za	Procurement	New Domain	Released AI
Your password expires today	helpdesk@yourco-it-support.com	Sarah James	Phishing	Quarantined
Final demand: outstanding VAT return	no-reply@revenue-notices.net	Finance team	Impersonation	Quarantined
Change of bank account from 1 November	accounts@makhanda-steel.co.za	Finance team	BEC	Quarantined
Scanned document from the office copier	scanner@copier-relay.net	Procurement	Malware	Quarantined
Please update my salary account	thandi.nkosi.payroll@outlook.com	Payroll	BEC	Quarantined

Example, made-up names. Live demo: demo.cyberframe.co.za

Phishing is the biggest risk to most companies.

54% of people clicked AI-written phishing emails, against 12% for ordinary ones.

33% of untrained staff click a phishing link.

$3.05bn was lost to business email compromise in 2025.

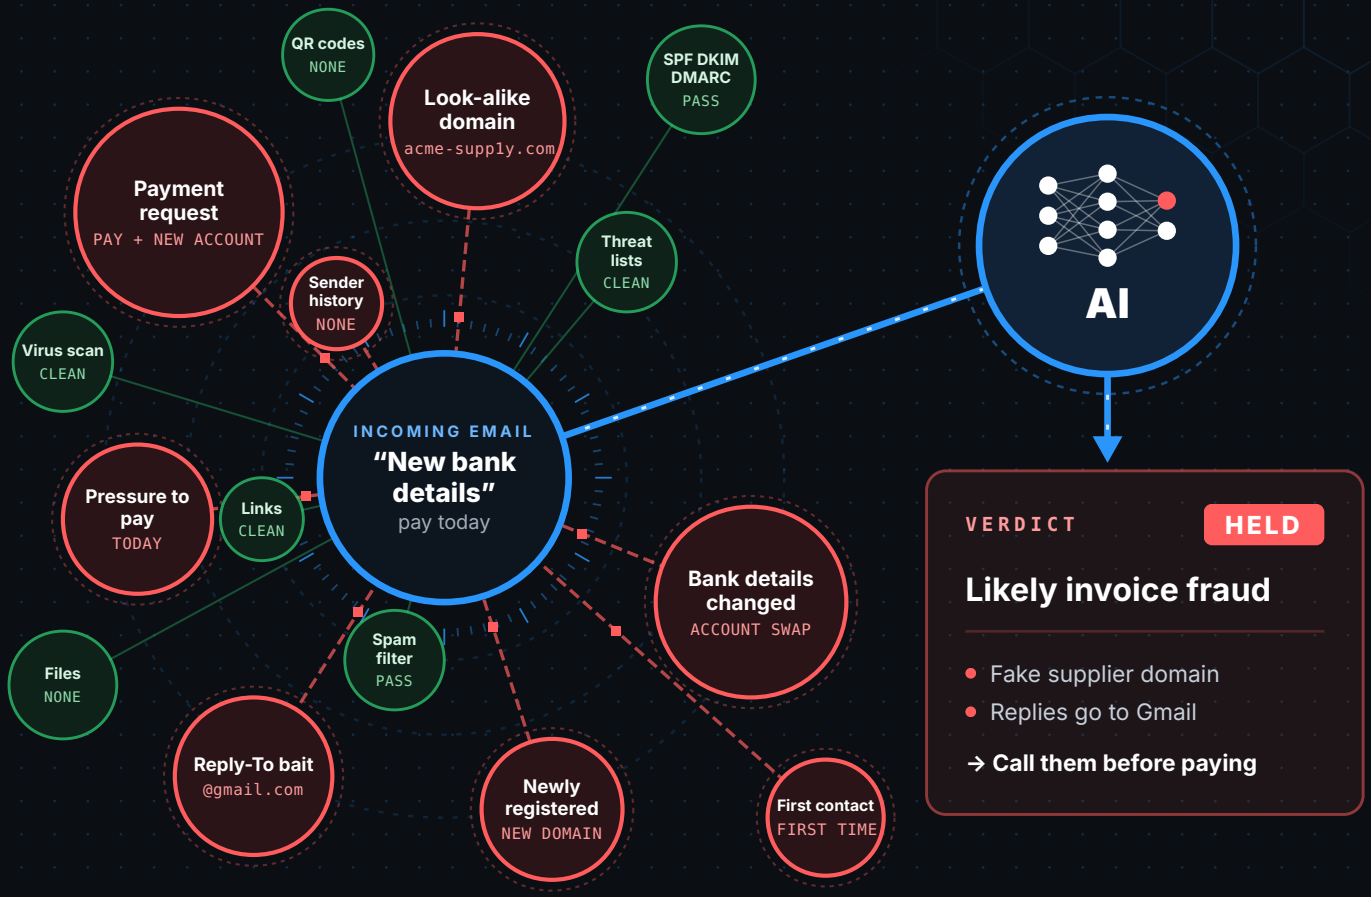

Sources: Microsoft Digital Defense Report 2025; KnowBe4 Phishing by Industry Benchmarking Report 2026; FBI IC3 2025 Annual Report.

02 HOW IT WORKS

See what SIFT sees.

300+ data points on every email. Every word. Every link. Every sender. **One clear answer.**

ILLUSTRATIVE EXAMPLE

WHAT SIFT HOLDS

Payment fraud

- Fake invoices
- New bank details
- Payroll fraud
- Email compromise (BEC)
- Thread hijacking

Impersonation

- Boss impersonation
- Look-alike domains
- Display-name spoofing
- Fake e-signatures
- Fake court summons
- Unknown first contact

Links and files

- Phishing links
- Cloaked links
- QR-code phishing
- Fake shared documents
- Dangerous attachments
- Macro malware

And the rest

- Viruses and malware
- Voicemail phishing
- Newly made domains
- Recipient probing
- Spam and junk
- Bulk newsletters

03 HOW IT COMPARES

What you get, side by side.

13 threats. Microsoft 365 on its own fully covers none of them.

Threat	SIFT	Microsoft 365 DEFAULT FILTERING	Google Workspace DEFAULT FILTERING	Typical spam filter
PAYMENT FRAUD				
Thread hijacking	YES	NO	NO	NO
New bank details and fake invoices	YES	ADD-ON	NO	NO
Business email compromise	YES	ADD-ON	NO	NO
Authority impersonation	YES	ADD-ON	PARTIAL	NO
First contact from unknown senders	YES	PARTIAL	NO	NO
Look-alike domains and display names	YES	ADD-ON	PARTIAL	NO
LINKS, ATTACHMENTS AND SENDERS				
Malicious and cloaked links	YES	ADD-ON	PARTIAL	PARTIAL
Newly registered domains	YES	ADD-ON	NO	NO
Fake shared-document lures	YES	ADD-ON	PARTIAL	NO
QR codes (quishing)	YES	ADD-ON	PARTIAL	NO
Weaponised documents and macros	YES	PARTIAL	PARTIAL	PARTIAL
Sender reputation	YES	PARTIAL	PARTIAL	PARTIAL
Recipient probing	YES	PARTIAL	PARTIAL	PARTIAL
LIVING WITH IT				
Plain-English reason on every held message	YES	PARTIAL	PARTIAL	NO
Release in two clicks	YES	PARTIAL	PARTIAL	PARTIAL
THE BASELINE EVERY FILTER COVERS				
Spam, known malware, blocked file types, SPF/DKIM/DMARC, internal spoofing, credential phishing	YES	YES	YES	PARTIAL

CASE STUDY Microsoft 365

Fraud that looked clean. SIFT caught it.

1 in 10 threats that SIFT caught looked clean to Microsoft

99.9%+ accuracy

SIFT clients on Microsoft 365, 90 days study. We compared Microsoft's verdict on every email with SIFT's: on 1 in 10 of the serious threats SIFT caught, Microsoft showed no warning signs. 99.9%+ accuracy.

Ratings from Microsoft and Google documentation, Oct 2026. Add-on: needs the paid Defender for Office 365.

04 FREE TRIAL

Test it on your own mail.

SIFT watches your real mail for 30 days and holds nothing until you say so.

HOW THE TRIAL WORKS

1 **Link**
Connect your mailbox.
Nothing to install.

2 **Watch**
Read-only access.
Nothing is held.

3 **Decide**
See what it would
have held.

4 **Protect**
Switch on.
SIFT holds the threats.

YOUR QUESTIONS, ANSWERED

What if SIFT holds an email I need?

It's rare: **0.001%** of email is held by mistake. You get direct access to SIFT to manage your own mail: release any email in two clicks, and SIFT learns from it.

Built with security in mind

YOUR DATA

- TLS encryption on every connection
- Backups public-key encrypted
- Personal data redacted before any AI review
- Zero data retention at the AI provider
- Retention set per client, deleted automatically

YOUR CONTROL

- Read-only Microsoft 365 mailbox access
- Two-factor sign-in, required by role
- Roles: admin, analyst, read-only
- Every release and rule change logged, by name
- Monitored around the clock, with alerts

Try it free for 30 days.

Then **$1.50** per mailbox a month.
